Education

She Codes Too - 29 Apr 2023 to 29 Oct 2023

Front-End Development Bootcamp

The 6 months bootcamp aims to provide learners with foundational web development skills to build interactive web pages using HTML5, CSS3 and JavaScript ES6. It also covers in-demand design skills to create professional page layouts using industry-standard tools such as Bootstrap, React, Figma, and Git. Lastly, it will prepare me for technical interviews for front-end developer roles.

Cyber Security Bootcamp - University of Technology - 07 Feb 2023 to 14 Feb 2023

Learn the basics of cybersecurity, what is cyberspace, and why is cybersecurity important? What is hacking, types of malwares, spyware, types of electronic attacks, penetration testing, preventive tips, and more.

UX UI Designer Course - 15 Nov 2022 to 10 Jun 2023

Design principles, choosing colors and their impact on the user, how to create a user experience, and also working on the user interface in projects by using Figma and AdobeXd applications for desktop, mobile, and dashboard.

Microsoft Office Course - 22 June 2022 to 11 Aug 2022

Learning to prepare reports, create book covers, greeting cards by using Word and Publisher. Create tables, how to use equations by Excel sheet. Learn to send emails using Outlook. Create integrated databases and build relationships between them by using Access.

A+ CompTIA Course - 07 May 2022 to 20 June 2022

basic skills of IT hardware management, operating system installation and support, software troubleshooting, networking and connections, device and network troubleshooting, basic security concepts, mobile device administration.

University of Technology - 05 Nov 2017 to 24 Oct 2021

Bachelor of Computer Engineering

Projects

- **Sndana**

A website for plant care that displays the types of plants and the details of each plant in terms of care, fertilization, and reproduction, with adding plants to the favorites page, the ability to comment, and other features.

- **Portfolio**

Personal Portfolio website designed with pure HTML and CSS and JavaScript for the intent of implementing and understanding the basics of Front-End development.

- **Cyber security**
Hacking into cameras, computers, and servers and obtaining accurate and sensitive information such as IP addresses, files, etc. By using the Kali linux systems and Osint tools.
- **StudentsDb**
A database designed specifically for course students to enter student data, including name, ID, phone number, date of birth, location, and find out the status of whether wages have been paid or not. View a report of the recorded data.

Professional Experience

Ecosystem of the University of Technology - 23 Apr 2023 to date

Volunteer in the association. Ecosystem provides a solution to eliminate unemployment among university graduates. This is done by sponsoring and supporting young entrepreneurs and creating job opportunities to employ graduates.

Datum Company - 22 Feb 2023 to 22 May 2023

Software Developer Intern. Training on soft skills and technical skills, as well as those responsible for managing meetings by writing meeting minutes and coordinating a work-in-progress application with the programmer and the customer.
